

A Total Approach to Health and Wellness

EMERGENCY CARE AGREEMENT

We are pleased to be able to provide this valuable service in your time of need. However, there are a few things that you need to be aware of.

1. Early intervention is essential to a speedy and more complete recovery; however, this does not guarantee instant relief. Most conditions requiring emergency care are associated with tissue inflammation (pain, swelling, heat, redness). These do not change instantly, regardless of the treatment provided.
2. The emergency services provided during non-regular business hours are designed only to provide the early intervention mentioned above. This needs to be followed up with care from your regular chiropractor or from one of our clinics located throughout Calgary and the surrounding areas.
3. Alberta Health Care (AHC) pays only a portion of the fees for this service; you are responsible for the remainder. The current fees for emergency care are \$100 for the history, exam and report of findings and \$60 for any treatment. **ALL FEES ARE DUE WHEN THE SERVICES ARE PROVIDED.**
4. Receipts will be provided so that you can make claims with any private health care plans that you might have.

I have read the above and understand the contents.
